Mendocino County's Local Food Guide

2nd Edition

a project of Anderson Valley Foodshed Group

The Anderson Valley Foodshed Group works toward a vibrant, healthy local food system for our community. We celebrate our local foods, farmers and gardeners. We aim to increase our capacity to grow a diverse, year-long supply of food for all who live here. We work toward these goals through education, connecting people to each other, and creating new opportunities to grow, process and enjoy locally grown food.

FOOD GUIDE COMMITTEE MEMBERS

PATTY BRUDER • STEVE HALL • LINDA MACELWEE

SARA McCAMANT • DOUG MOSEL • DIANE PAGET

MARY PAT PALMER • CINDY WILDER

We wish to thank:

- Lea Redmond for showing us a copy of Oregon's North Coast Food Guide and starting the ball rolling,
- Julie Honneger and the Willits Action Group for taking the surveys to Farmer's Markets and other places where farmers are found,
- Marty Johnson, Tommie Lemons, Carolyn The Fish Peddler and Will Dennison for the information about local fish,
- Everyone who sent us photographs,
- The Anderson Valley Chamber of Commerce for sponsoring us,
- North Coast Opportunities, Inc. and the Willits Action Group for supporting Patty Bruder in doing this work,
- The other members of the Foodshed Group, especially Barbara Goodell, for their continued help, support and encouragement.

The re-publication of the guide was made possible by donations from California Endowment, North Coast Opportunities Community Action, Mendo Food Futures, AV Chamber of Commerce and the City of Willits.

The guide only includes farms whose food is available within the county. If you are a Mendocino County farmer selling locally and we missed including you in this edition of the guide, please contact Diane at dpaget@mcn.org or 895-3354. You may also contact her with comments about the guide or to locate more copies.

Mendocino County's Local Food Guide committee has made every effort to ensure that this publication is informative, complete and accurate. It does not make any representation or warranty as to the accuracy of any of the information contained in this publication, nor as to the agricultural and business practices of any member farm or the condition or quality of the farm crops produced or sold there.

Enjoy! Eat Local!

Why Buy & Eat Local?

1. PROMOTE A LOCAL ECONOMY

Spent locally, our dollars recirculate in our communities. Buying directly from local farmers generates 44% more money for the local economy than purchasing food at supermarkets.

2. HELP FARMERS

On average, farmers receive only 20 cents of each dollar we spend on food. The rest goes to packaging, processing, transportation, and, most of all, advertising. By buying local, we assure that local and regional family farmers can get full retail price for their food – which means farm families can afford to stay on the farm.

3. IT TASTES BETTER & IT'S BETTER FOR YOU

Fresh produce loses nutrients quickly. In a week's delay from harvest to dinner table, sugars turn to starches, plant cells shrink, and produce loses its vitality. Processed foods, sweetened with high fructose corn syrup and filled with hydrogenated oils, are linked to many health problems, including obesity and diabetes. Food grown in our community was probably picked within the last day or two. It is crisp, sweet and loaded with flavor and nutrition.

4. KNOW WHO DOES THE GROWING

By buying locally, we can develop a relationship with the people growing our food. When we value our food and the people who produce it, our quality of life as a community grows.

5. FROM FARM TO FORK

Today the average food item travels roughly 1400 miles from farm to fork. Energy intensive industrial agriculture, wasteful packaging, and long-distance food transportation are responsible for roughly 20% of all climate-disrupting greenhouse gases. Buying locally reduces transportation costs and our dependence on foreign oil.

6. FOOD SAFETY

Concern about food safety, from Mad Cow Disease to dangerous pesticide residues, is another reason many are turning to organic and local food, which provides a safe alternative to industrially produced food.

... how we eat determines, to a considerable extent, how the world is used.

- WENDELL BERRY

It makes a Difference!

7. FOOD SECURITY

If the county were to become isolated, food grown in the area would be available for use. At present, in case of a disaster or other emergency when outside connections are lost, we would have a limited amount of food. We increase our security with a strong local food system.

8. Preserve Farmland and the Environment

As the value of locally produced meats, fruits and vegetables increases, selling farmland for development becomes less likely. A well-managed family farm is a place where the resources of fertile soil and clean water are valued. In addition, the patchwork of fields, hedgerows, ponds, and buildings is the perfect environment for many species of wildlife. When you buy locally grown food, you are helping to preserve our agricultural landscape and rural community.

9. THE TRUE COST OF FOOD

The price we pay at the supermarket checkout counter doesn't reflect the true costs of industrial agriculture: pollution and public health damage resulting from massive toxic pesticide and fertilizer use, sweatshop conditions for farm workers, water pollution from agriculture runoff, and billions of dollars in taxpayer subsidies that mainly go to a handful of large corporations. When we buy from our local farmers and stores, we can feel good about what our dollars are supporting.

10. WHY BUY AT LOCALLY OWNED STORES?

Local farmers, dairies and businesses are more accountable and invested in our community than industrial farms and big box chain stores. Supporting our local stores keeps our money and resources in our community. Local store owners employ our neighbors and provide an invaluable service to us. If we don't shop locally, the local stores will disappear. It's our choice!

A Note from the Committee:

WE FOUND THAT SOME STAPLE FOODS ARE NO LONGER GROWN HERE, SUCH AS DRY GRAINS AND BEANS. THEY CAN BE GROWN HERE AND WE HOPE THAT AS THE DEMAND FOR LOCALLY GROWN FOOD INCREASES, FARMERS WILL BE ENCOURAGED TO GROW THEM AGAIN.

Growing Practices

AN EXPLANATION OF TERMS

The farms are categorized with terms participants have chosen from our questionnaire. We're not in a position to assure that the categories chosen are correct—that can be verified by a certifying agency or by the Mendocino County Department of Agriculture.

Biodynamic: Emphasizes the total farm as a holistic organism using specific sustainable practices (most fertilizers and animal food are produced on the farm). Some farms are certified, some are not, but all adhere to the same specific criteria expected of certified biodynamic growers.

Organic: Grows according to standards for organic certification, without the use of chemicals, pesticides, herbicides or fungicides, and without genetically engineered seeds or plants. These can be certified—maintaining records of the farm management plan with annual fees, inspections and review of practices to ensure compliance—or not certified, but all adhere to the same specific criteria expected of organic growers with the exception of record keeping, fees, inspections and reviews.

Mendocino Renegade Certification: Assures organic claims at reasonable cost to local producers and processors, with minimal paperwork. Not part of the USDA certification system, Mendocino Renegade aims to minimize the role of government and politics in organic agriculture.

Transitional: Participating in the three-year process of becoming certified organic.

Combination: Utilizes some biodynamic, organic practices, or natural principles, but will use conventional methods when the health of a crop or animal is endangered.

Natural: Uses growing practices that encourage a natural balance of soil fertility and animal/plant health, prevention of diseases, and decrease of insect/pest infestation. Only non-synthetic pesticides, herbicides, or fungicides are used whenever the health of a crop or animal is endangered. Unlike organic certification, this category has no provision for verification.

Conventional: Uses methods that include synthetic materials (chemical fertilizers, fungicides, pesticides, herbicides) to increase production and decrease labor costs, and the training and permits for using these materials. May use Integrated Pest Management to avoid unnecessary use of pesticides unless insect traps indicate a significant presence.

Wild crafted/wild harvested: May have no control over the wild environment—for example, contaminants in our oceans or forests—but makes every effort to harvest a healthy product by choice of location, laboratory testing or other practices. Harvesting practices ensure continuation of the species with minimal negative impact on its habitat.

Note: The terms "organic" and "biodynamic" are now registered trademarks of the USDA National Organic Program and the Demeter Association, respectively, and may not be used unless the grower or processor is certified by one of these organizations.

1-THE APPLE FARM

Ask for: Tim Bates

We offer: Peaches, persimmons, apples, quince, and pears; vinegar, juice, hard cider, cider syrup, dried fruit (Oct-May); sometimes we have apple trees

Our heirloom apples are grown on Navarro River bottom soil. Morning fog and hot afternoons produce tender skinned and intensely perfumed fruit from 1700 trees ranging in age from young whips to 90 year old specimens. The orchard is truly a treasure in an area that is quickly losing its diversity. The idea of looking at the farm as a complete organism is central to Biodynamics[®], which we began practicing in earnest several years ago.

Growing Practice: Mendocino Renegade and Stellar Organic certification

Where to find our goods: Ukiah FM; Fruit and juice only at Ukiah Natural Foods, Corners of the Mouth, Downhome Foods, Harvest Market and Lemons Market; at the Farm (dawn to dusk)

18501 Greenwood Rd, Philo, 95466

Ph: 895-2333
Em: applefarm@pacific.net
Wb: www.philoapplefarm.com
Available for special events and internships.
Visitors welcome daily, 8am-8pm.

2-ARISTAEUS GARDENS & HONEY

Ask for: Shari DeJoseph

We offer: Purple artichokes, purple asparagus; honey

≪ This is a new farm which will expand in the next 2-3 years to include more produce.

Growing Practice: Organic practices, not certified

Where to find our goods: Ukiah FM

12451 Power House Rd, Potter Valley 95469 Ph: 743-1497 Please contact us by: phone No visitors at this time.

Abbreviations

• AV: Anderson Valley

• CSA: Community Supported Agriculture

• FM: Farmers Market

• LR: Little River

• Mendo: Mendocino

• PV: Potter Valley

3-BIG RIVER NURSERIES AND RAVEN'S RESTAURANT

Ask for: Dana Ecelberger or Jeff Stanford

We offer: Salad greens, herbs, cole crops, artichokes, braising greens, and many more kinds of vegetables; many culinary and Chinese medicinal herbs; nursery trees and plant starts sometimes available

We are a bed & breakfast hotel with 10 acres of organic gardens and landscape, an organic nursery and a vegetarian/vegan restaurant that features the CCOF and Renegade certified produce, herbs, fruits and flowers that we propagate and grow here as well as Mendocino county wines. We try, as much as possible, to be a closed loop system. We compost all of our kitchen wastes and have horses and llamas for the manure component. We compost in windrows that reach high temperatures. Our property is chemical free, wherever possible, and we recycle religiously. We believe in the rights of animals and so we do not serve any meat or fish, we do not use meat or fish products in the growing of our gardens. We raise bees for pollination of our crops.

Growing Practice: Organic, certified by CCOF, Mendocino Renegade

Where to find our goods: On site at the Stanford Inn

44850 Comptche Ukiah Rd, Mendocino Ph: 937-5615

Em: danaae3@yahoo.com, jeff@stanfordinn.com Wb: www.stanfordinn.com

Available for appointments, special events and internships.

Restaurant open 7 days/week for breakfast & dinner

4-BLUE MEADOW FARM

Ask for: Pam Laird

We offer: Strawberries, French prunes, Asian pears; walnuts; salad greens, lettuce, kale, chard, mustard greens, Mei Qing choi, broccoli, beetroots, onions, beans, tomatoes, sweet peppers, chilis, eggplant, summer and winter squash, cucumbers, pumpkins; basil, oregano, dill, thyme, mint; tomato, pepper and eggplant starts

We are a small family farm in Anderson Valley growing beautiful organic vegetables year-round and flowers in season. We're particularly known for our heirloom tomatoes, peppers, sunflowers and greens. Our farm stand is open daily from mid April through November and irregularly throughout the winter. You can also find our produce at local grocery stores and restaurants in Anderson Valley and at the Boonville Farmers Market. We are expanding our small CSA. Call for more information.

Growing Practice: Organic practices, registered with the State

Where to find our goods: Boonville FM and sometimes the AV Grange Mart; Farm stand: 10 a.m. - dusk (mid-April–Nov); CSA available: weekly baskets (May–Nov)

17.45 mile marker, Hwy 128, Philo 3301 Holmes Ranch Rd, Philo 95466

Ph: 895-2071

Em: bluemeadow@mcn.org Please contact us by: phone or email. Available by appointment, and for special events and internships.

Visitors welcome, 10am - dusk.

5-BOB GATES ORGANICS

Ask for: Bob Gates

We offer: Salad greens, cabbage, beans, peppers, eggplants, cucumbers, and herbs

✓ We are a small organic farm in Redwood Valley. We have farmed the same organic garden for 23 years.

Growing Practice: Organic practices, registered with the State

Where to find our goods: Redwood Valley FM, Ukiah Natural Foods, at the farm by appointment

10151 East Rd, Redwood Valley 95470 Ph: 485-5060 Em: salvagebrand@comcast.com

Please contact us by: email Visitors by appointment.

6-BOONT ORGANICS

Ask for: John

We offer: Seasonal vegetables, U Pick Roma Tomatoes; eggs, milk from our Cow Share

← Our ten-acre, family-run organic farm features small-scale handpicked produce, crop rotation, and local inputs of amendments and mulches—we buy only seed!

Growing Practice: Organic, CCOF certified

Where to find our goods: Boonville FM, Boont Berry Farm and Ukiah Natural Foods

PO Box 263, Boonville 95415

Ph: 895-9028

Please contact us by: phone

Visitors call for appointment. Volunteers welcome.

7-BROCK FARMS

Ask for: Vickie or Mike Brock

We offer: Plums, peaches, strawberries. salad greens, broccoli, cauliflower, carrots, peas, beans, tomatoes, sweet peppers, eggplant, summer squash, cucumbers, onions, winter squash, pumpkins, gourds; basil

A husband/wife work-in-progress, Mike and Vickie farm three acres organically. 2009 is our twentieth year selling directly to customers. Mike also grows pumpkins for competition. We love growing.

Growing Practice: Organic practices, not certified

Where to find our goods: Boonville, Fort Bragg, Mendocino FMs; farm stand, Boonville Hotel and Lauren's Restaurant

Bottom of Peachland Rd, Boonville PO Box 308, Boonville 95415 Ph: 895-3407

Please contact us by: phone

Visitors welcome during business hours.

8-BROOKSIDE FARM

Ask for: Jason Bradford

We offer: Cherries, plums, peaches, persimmons, apples, pears, Asian pears, strawberries, blackberries, grapes, raspberries, blueberries; salad greens, hearty greens, broccoli, carrots, peas, parsnips, beans, tomatoes, sweet peppers, hot peppers, eggplant, summer squash, turnips, cucumbers, onions, garlic, winter squash, pumpkins, gourds; rhubarb, potatoes, radishes, asparagus, artichokes and Jerusalem artichokes; basil, coriander, oregano, rosemary, thyme, sage and parsley; wheat, rye, oats, barley

∼ A vegetable and fruit CSA on 1 acre
 within the City of Willits. Uses mostly
 hand labor. Distributes produce year round by over-wintering hardy crops and
 growing for storage.

Growing Practice: Organic practices, Mendocino Renegade Certified

Where to find our goods: Willits CSA, Mariposa Market, Burrito Exquisito & Purple Thistle in Willits

Spruce & Lincoln Way, Willits 284 Redwood Ave, Willits 95490

Ph: 456-0760

Em: jcbradford4@gmail.com Wb: www.gardensproject.org

Please contact us by: email or phone

Available for special events, work parties and internships.

Open house for volunteers and visitors every Tuesday from 3 to 6 pm. Otherwise contact for availability.

9-BOUNTIFUL GARDENS

We offer: Seeds—some grown locally, others from outside sources

≪ Bountiful Gardens sells untreated open-pollinated seed of heirloom quality for vegetables, herbs, flowers, grains, green manures, compost and carbon crops. Offering Biointensive and Grow BiointensiveTM sustainable organic seed. **Growing Practice:** Vary with types of seed

Where to find our goods: mail order and at our store

18001 Shafer Ranch Rd, Willits 1726 D, South end of Evergreen Shopping Center Ph: 459-6410

Em: bountiful@sonic.net

Wb: www.bountifulgardens.org

Please contact us by: phone, email, mail *Visitors welcome weekdays, 9am,-4pm.*

10-BUDDING PROSPECTS FARM

Ask for: Andre Pinel

We offer: Apples, pears, figs, pluot/ aprium, plums; salad greens, leeks, green garlic, tomatoes, peppers, winter and summer squash, pumpkins, cucumbers; many different herbs, ornamentals and flowers

Approximately three acres of terraced garden beds, southwest facing near Signal Ridge off Mountain View Rd. Mature fruit trees and year-round vegetables. Planted with love!

Growing Practice: Organic and biodynamic practices, not certified **Where to find our goods:** Boont Berry Farm

PO Box 11, Boonville 95415

parties and internships

11-BURNSTAD FARMS

Ask for: Jenny Burnstad

We offer: Hearty greens, carrots, peas, summer squash, onions, garlic, winter squash, rhubarb; culinary & medicinal herbs; eggs; rabbits

✓ We try to feed ourselves primarily from our garden and share or sell excess produce.

Growing Practice: Organic practices, Mendocino Renegade certified **Where to find our goods:** the farm

12150 Pine Ave, Potter Valley PO Box 1435, Ukiah 95482

Ph: 743-1287

Em: jen@cloudforest.org

Wb: www.cloudforest.org

12-BUTLER CHERRY RANCH

Project

Ask for: Dot Broverney

We offer: Apples, cherries, peaches, blackberries and raspberries

The Butler Cherry Ranch Project is a non-profit organization under local sponsorship by Cloud Forest Institute. The Project honors the memory of longtime Ukiah cherry ranchers George and Ella Butler through its community orchard in Mendocino County. Our community orchard, located on two acres at Ridgewood Ranch near Willits, has 35 historic apple trees and 50 young cherry and peach trees. We hope to harvest our first cherries summer 2009 but, of course, that is up to Mother Nature, not us.

Growing Practice: Organic practices, not certified

Where to find our goods: Please contact us for availability.

1117 W. Perkins St, Ukiah 95482

Ph: 463-2736

Please contact us by: phone, email, mail Available by appointment and for special parties, internships and work parties.

13-CHESTNUT RIDGE RANCH

Ask for: Tom Brewer

We offer: Chestnuts

We grow and sell Colossal chestnuts on a small commercial scale.

Growing Practice: Combination Where to find our goods: Boonville FM (Oct); Boont Berry Farm, Gowan's Oak Tree, The Apple Farm, Corners of the Mouth, Harvest Market, Mariposa Market, Down Home Foods, Oakville Grocery in Healdsburg and Piedmont Grocery in Oakland; online; local restaurants

PO Box 119, Boonville 95415

Ph: 895-3870

Em: tkbrewer@mcn.org

Wb: www.chestnuts-for-sale.com Please contact us by: phone, email Visitors by appointment.

In a scant 50 years we have come to the point where most eaters don't know where their food comes from. A point where most people don't know a farmer personally (and farmers make up less than 2 percent of the population). Where any produce is available anywhere all the time, without a thought to season or distance.

-WENDELL BERRY
THE IDEA OF A LOCAL ECONOMY

14-CINNAMON BEAR FARM

Ask for: Jack & Mimi Booth

We offer: We offer over 100 varieties of produce such as tomatoes, peppers, eggplant, beans, herbs, summer squash, pumpkins, winter squash, cucumbers, beets, garlic, stone fruit, figs, grapes, walnuts, and olive oil. We grow what we love to eat and we enjoy trying unusual varieties.

✓ Our unique farm is only a few miles from the city of Ukiah, yet it's agricultural value is priceless. It is bordered by oak woodland hillsides, riparian habitat next to the West Fork of the Russian River, and a vineyard. Rich river loam provides ideal growing conditions, supplemented by mountains of our home-made natural compost. Habitat is preserved for birds who repay us by eating copious quantities of crop damaging insects. Honey bees are raised to pollinate flowers for increasing production. Our hands-on operation, with our new partners, John and Sara Bailey, ensures that we are fully involved in healthy growing practices as well as careful harvesting to ensure incredible freshness.

Growing Practice: Organic practices, not certified

Where to find our goods: Ukiah, Fort Bragg, and Mendocino FMs;

3551 Eastside Calpella Rd, Ukiah 95482

Ph: 468-5837

Em: cnnbear@cinnamonbearfarm.com Wb: www.cinnamonbearfarm.com

No visitors.

15-COVELO ORGANIC

Ask for: Tom Palley

We offer: Apples, Asian pears, melons, watermelons, strawberries, blackberries and raspberries; salad greens, hearty greens, broccoli, cauliflower, carrots, peas, beets, beans, tomatoes, sweet peppers, hot peppers, eggplant, summer squash, parsnips, turnips, cucumbers, onions, garlic, leeks, winter squash, pumpkins, gourds; corn; basil

∠ We farm fifteen certified organic acres, producing 60 varieties of vegetables and 30 varieties of flowers, which are sold at six farmers markets, to stores and restaurants, and to 60 CSA members who get a box each week.

Growing Practice: Organic practices, certified by CCOF and Mendocino Renegade

Where to find our goods: Local CSA, Covelo, Willits, Ukiah, Mendocino and Fort Bragg FMs; Mariposa Market, Ukiah Natural Foods, Corners of the Mouth, Harvest Market, Keith's in Covelo

23090 Hopper Lane, Covelo 95428

Ph: 983-6562

Wb: www.greenmac.com/coveloorganic *Visitors by appointment*.

16-CREEK SIDE FARMS

Ask for: Gordon Brown

We offer: Squash, tomatoes, eggplants, pole and bush beans, melons, watermelon, onions, potatoes, peppers, peas, cucumbers, oriental greens, chard, lettuce, okra, carrots, beets and more; various herbs; seeds and plant starts

We grow mostly heirloom, open pollinated vegetables, melons, herbs and plant starts in the spring. We adhere to all the same specific criteria expected of certified organic growers with the exception of record keeping, fees, inspections and reviews.

Growing Practice: Organic practices, not certified

Where to find our goods: Willits and Ukiah FMs

12702 Eel River Rd, Potter Valley 95469

Ph: 743-1778

Em: seedtracker@sonic.net Please contact us by: email

17-DEAR MEADOW FARM

Ask for: Michael and Alexandra Curry

We offer: Strawberries and melons; tomatoes, squash, cucumbers, peppers, cauliflower, broccoli, collards, chard, celery, lettuce, turnips, beets, beans, potatoes, carrots, cabbage, asparagus, eggplant, zucchini, pumpkins; basil, cilantro, thyme, sage, parsley

◆ Our farm is a small farm on the shady side of the hill, lots of trees and deer. My dad and I started the farm last year, so we are beginning farmers. We have learned a lot from the local farmers. We named the farm after the two women who owned the farm before my parents.

Growing Practice: Organic practices, not certified

Where to find our goods: Willits and Ukiah FMs; Ukiah Natural Foods

18851 Shafer Ranch Rd, Willits 95490 Ph: 456-1032 Please contact us by: phone *Visitors by appointment*.

18-FLOWERS BY THE SEA

Ask for: Kermit Carter

We offer: Small fruit: strawberries, red raspberries, boysenberries, Marion berries; a large selection of cool season varieties; many common and uncommon culinary and medicinal herbs from all over the world (see complete listing on our website); Aracanua and other heirloom egg varieties during Farmers Market season

→ A family owned and operated, highly diverse small farm that has been Demeter certified Biodynamic and Stellar certified Organic since its inception in 1991.

Growing Practice: Biodynamic, certified by Demeter; Organic, certified by Stellar

Where to find our goods: Gualala, Mendocino, Ft. Bragg, and Ukiah FMs

Ph: 877-1722 Em: info@fbts.com Wb: www.fbts.com Visitors by appointment.

19-ELMER ORCHARDS

Ask for: Terry Elmer

We offer: Heirloom & modern tree fruit: Apples, Asian pears, cherries, plums, pluots, figs, apricots, peaches

We are a small family orchard that specializes in a variety of peaches that do well in Mendocino County.

Growing Practice: Combination **Where to find our goods:** Ukiah FM

PO Box 222, Potter Valley 95469 Ph: 743-1482, 272-4249 Please contact us by: phone

20-FANDANGO SPICE GARDEN Ask for: Cheryl Gostisha

We offer: Cherries, plums, peaches, persimmons, apples, pears, Asian pears, and blackberries; tomatoes, hot peppers, pumpkins, gourds; rhubarb; vegetables; jam, most herbs

A remote, century-old homestead, we have been selling great jam for ten years.

Growing Practice: Organic practices, CCOF certification pending; Biodynamic practices, not certified

Where to find our goods: Gualala, Healdsburg and Berkeley FMs; Surf Super, Clos du Bois, John Doughty House, Annapolis Winery and Two Fish Bakery

PO Box 7, Annapolis 95412

Ph: 886-1929

Em: fanjam@mcn.org Please contact us by: email

21-FILIGREEN FARM

Ask for: Stephanie Tebbutt

We offer: Apples, Asian pears, blueberries, cherries, pluots, wine grapes, peaches; local & organic olive oil

∼ Filigreen Farm is a mixed fruit farm, utilizing the principles of biodynamic agriculture. The farm's harvest season begins with blueberries in early June and ends with late apples and olives in November.

Growing Practice: Biodynamic practices; Organic, certified by CCOF

Where to find our goods: Live Power Farm CSA, Boont Berry Farm and Ukiah Natural Foods, Boonville FM

11800 AV Way, Boonville 95415 Ph: 895-2111 Please contact us by: mail Visitors by appointment.

22-THE FISH PEDDLER

Ask for: Kevin Akin

We offer: Fish year-round

Family owned and operated seafood market offering local wild ocean-caught seafood. We offer fresh and smoked wild salmon, Dungeness crab, Ling cod, Pacific snapper, Petrale sole, halibut, oysters, and more.

Growing Practice: Wild-harvested **Where to find our goods:** Mendocino, Ukiah, Fort Bragg, Boonville and Willits FM's; Seafood market in Noyo Harbor, Ft Bragg

32440 N. Harbor Dr, Fort Bragg 95437 Ph: 972-4781 Em: kevin_akin@hotmail.com Please contact us by: phone and email *Tours available*.

23-FLOODGATE FARM

Ask for: Bill Taylor

We offer: Salad greens, hearty greens (kale, chard, collards), broccoli, tomatoes, tomatillos, onions, garlic, summer squash, rutabagas, turnips, potatoes, beets, cut flowers on occasion; oregano, rosemary, basil; occasionally brassicas, tomatoes, hardy kiwi, grapes, and lettuce seedlings; dried apples, dried tomatoes, Sept-Mar

Floodgate Farm is two small market gardens, one near Floodgate Creek and the other a 60 by 75' garden in Boonville at 900' elevation where nights are warmer. Both sites are registered organic. A specialty is wild salad mix with herbs, flowers, and flavorful greens. I love the process of gathering all the different flavors and colors for the salad mix. I have designed and implemented water catchment systems to use rainwater to supplement a spring in the driest months and am willing to share what I have learned.

Growing Practice: Organic practices, registered with the State

Where to find our goods: Boonville FM, AV Grange Mart, Boont Berry Farm (occasionally)

2400 Hwy 128, Philo 95466

Community Supported Agriculture

When a consumer joins a CSA, the farmer provides a weekly basket of fresh, high-quality fruit and vegetables in season. The shareholder provides financial

and sometimes volunteer support to the farm for a minimum of one growing season. Members of a CSA farm share risks with the farmer. Obtaining one's food through a community farm rather than a market requires a different approach and consciousness. Learning how to utilize food that is local and seasonal can challenge new members because the preparation, preservation, and storage of food that comes straight from the land is much different than deciding on a menu and then shopping for it.

Adapted from the Live Power Farm website, www.livepower.org

28-GOWAN'S OAK TREE

Ask for: Grace Espinoza

We offer: Cherries, plums, peaches, pluots, persimmons, apples, pears, Asian pears, grapes, blackberries, raspberries, boysenberries, loganberries; walnuts; salad greens, broccoli, peas, beans, tomatoes, sweet peppers, hot peppers, eggplant, summer squash, cucumbers, winter squash, pumpkins, gourds; potatoes, corn; dried fruit, apple cider, apple sauce, fruit jams, apple pies

We grow apples for commercial sale and also for our fruit stand. We grow a variety of produce for sale at our roadside stand. We use Integrated Pest Management to avoid use of pesticides.

Growing Practice: Conventional Where to find our goods: Ukiah, Fort Bragg, Willits, and Mendocino FMs; farmstand (8 a.m.-8 p.m. summer, 8 a.m.-6 p.m. from Sept-May)

30-GREEN UPRISING AT BLACKBERRY BEND

Ask for: Michael Foley

We offer: Apples, pears, blackberries; walnuts; salad greens and lettuce; Asian greens, cabbage, collards, kale, eggplant, peppers, tomatoes, bulb fennel, beets, turnips, carrots, basil, cilantro, dill, oregano, rosemary, thyme; vegetable and flower starts at beginning of season

We're a small, extended-family farm on five acres, with market garden, old and new orchards, and berry patches. We market at the Willits Farmers' Market, a small CSA, and our self-serve roadside stand. A new production hoophouse allows us to grow greens year-round, and we specialize in salad greens and (in season) garlic. In a good fruit year, we have lots of apples and Bartlett pears, as well as wild blackberries.

Growing Practice: Organic practices, not certified

32-HAPPYBELLY

Ask for: Holly Madrigal

Mendocino-grown food delivered to Willits. A year-round subscription to seasonal food produced as locally to Willits as possible. Offering poultry, beef, pork, lamb, olive oil, honey, homemade pies and fruit. I do not produce, but gather for sale and distribute a "share" similar to a co-op. You can purchase a "lamb share" and an "olive oil share" for example, which would provide you with one half a cut and wrapped lamb from Hael Creek Farm and three gallons of olive oil from three different farms. All food is local to Mendocino County.

Growing Practice: Producers use organic or biodynamic practices, but may or may not be certified.

Where to find our goods: Pick ups are made at the Willits Farmers Market

178 Pearl St, Willits Ph: 459-0447

43-LOVER'S LANE FARM

Ask for: Keith and Kate Fegin

We offer: Walnuts (in season); Tamworth pork (spring & fall); comb and chunk honey (spring); beeswax (fall); Vetch blossom honey (May & June); wildflower honey all year; herb infused body care products

Lover's Lane Farm is a small, husband and wife beekeeping and food farming operation in the outskirts of Ukiah. We specialize in locally produced and varietally distinct honey. We also produce an assortment of body care products using ingredients from our hives and our farm. All of our beehives are located within Mendocino County. We avoid synthetic chemicals in our hives, using essential oils and mechanical methods for hive health, as well as superior breeding stock. Our honey is unprocessed and unfiltered, using a "hands-off" philosophy.

The explosion of farmers markets and Slow Food points to the growing number of consumers, farmers, and local businesses that have already shifted their role in the food chain, detaching themselves from long-distance cuisine to live within their foodsheds. It is the fact that communities around the world all possess the capacity to regain this control that makes the simple idea of eating local so powerful.

59-OCEAN HARVEST SEA VEGETABLE COMPANY

Ask for: Terry Nieves

We offer: Sea vegetables

≪ Ocean Harvest Sea Vegetable Company is a small seaweed wild crafting business. We harvest wild seaweeds in a sustainable and ethical manner along the Mendocino Coast. We then sun dry our seaweeds in the redwoods so as to offer you a delicious, raw, nutrient rich ocean food. We offer 9 varieties of sea vegetables: kombu, wakame, sea palm, dulse, nori, fucus. OHSV exclusively harvests silky sea palm, sweet kombu and ocean ribbons. We also flake and mix our sea veggies to bring to you a delicious seven seaweed blend and sea veggie gomasio. Seaweed is a "superfood", filled with abundant trace minerals, vitamins and nutrients. Sea veggies store well in a dark dry place. You can find delicious raw and cooked recipes in our sea vegetable preparation booklet.

Growing Practice: Wild-harvested **Where to find our goods:** Ukiah Natural Foods, Corners of the Mouth; Mail order: call or visit our website email orders

75-SMART'S MOUNTAIN FARM

Ask for: Peggy and Dennis Smart

We offer: Loganberries, blackberries, raspberries, blueberries; walnuts, almonds; tomatoes, peppers, herbs, lavender, squashes, onions, garlic, peppermint, hops; thornless loganberry, blackberry, strawberry, raspberry starts; mixed colors of eggs

Our registered organic farm is located on Pine Ridge, 100+ acres situated on a mountain near the headwaters of Robinson Creek (Russian River drainage) and the headwaters of Indian Creek (Navarro River drainage). Due to

the orographic effect of our mountain, we receive 30% more precipitation than Ukiah. Our apples and walnut trees are dry farmed. Our goal is to increase the production of fruits, nuts and vegetables each year. We grow a number of varieties of heirloom tomatoes and peppers (ranging from mild to fire-hot). We grow several varieties of lavender for bouquets and sachet. We raise cage-free chickens. We also grow hops.

Growing Practice: Organic practices, not certified

Where to find our goods: Ukiah FM, Ukiah Natural Foods

7451 Robinson Creek Road

Ph: 462-7259

Em: pegsmart@yahoo.com

76-SNAG END FARM

Ask for: Tim Bray

We offer: Apples, pears, strawberries, raspberries; beans, bok choy, broccoli, brussel sprouts, cabbage, Chinese cabbage, carrots, celery, garlic, leeks, onions, parsnips, peas, pumpkins, scallions, shallots, squash, turnips

We have a large garden expanding into a tiny farm near the west end of Middle Ridge, Albion, about a mile from the sea. We supply fruits and vegetables to local customers. We are working toward a sustainable biodynamic operation. Currently we are producing most of our own nitrogen on the farm, but importing minerals. We use no pesticides or herbicides.

Growing Practice: Natural **Where to find our goods:** Albion FM

PO Box 873, Albion 95410

Ph: 937-4422

Please contact us by: email

77-SONIA ANZILOTTI

Ask for: Sonia Anzilotti

We offer: Lemons, persimmons

✓ We have one persimmon and two large Meyer lemon trees, with recipes to share.

Growing Practice: Organic practices, registered with the State

Where to find our goods: Ukiah Natural Foods, Mariposa Market

Ph: 462-7006

Please contact us by: phone

78-STELLA CADENTE OLIVE OIL CO.

Ask for: Julia Conway

We offer: Olive oil; olio nuovo available immediately upon harvest; L'Autunno extra virgin available December; flavored oils available in March

We are an artisan, award-winning olive oil producer with olive groves in Anderson Valley. We grow organically but are not currently certified by CCOF. We hand-pick our olives to prevent bruising and crush the olives on a stone crusher (the old fashioned way). Our flavored oils are all "crushed" oils-the fruits or herbs are crushed together with the olives in a simultaneous action, giving a much more fruity aroma and taste.

Growing Practice: Organic practices, not certified

Where to find our goods: Harvest Market; Ukiah Natural Foods, Lemon's Market; Boont Berry Store; mail order via the web or email

17451 Jade Court, Fort Bragg 95437

We grow fresh naturally-raised produce, fruit and eggs. We also do a limited number of free range broiler chickens. We plan to do value-added products on the farm as business progresses.

Growing Practice: Organic practices, not certified

Where to find our goods: Farm stand

19941 N Hwy. 101, Willits 95490

Ph: 456-0200

Em: harrywalter@willitsonline.com Please contact us by: phone, email *Visitors welcome*.

The seeds that gardeners hold in their hands at planting time are living links in an unbroken chain reaching back to antiquity. Our stone age ancestors began identifying and domesticating food plants thousands of years ago, with the simple act of selecting seeds for replanting. Whenever gardeners begin to save their own seeds, they also become part of this ancient tradition.

-SUZANNE ASHWORTH SEED TO SEED

80-TODD ORGANIC ORCHARDS, INC.

Ask for: Dan Todd

We offer: Organic Barlett and Red Sensation pears, Bosc pears

◆ Our land was a conventional pear orchard that we transitioned to organic in the mid 80's. We have 37 acres of pear orchard on our home place and 20 acres at a separate location. We have been farming organically for over 20 years. Our fresh pears are shipped all over the United States and our off-grade pears are turned into Smuckers quality pear juice and Earth Best baby food.

August, Hopland, 2 day celebration of renewable energy and sustainable living. Speakers, workshops and panel discussions, for more info. www.solarliving.org

Pure Mendocino

County-wide celebration of local organic food and wine on the last weekend in August, including dinner, tastings, and farm tours. Benefits the Cancer Resource Centers of Mendo. County. For more info visit www.puremendocino.com or call (800) 499-6483.

Harborfest

Point Arena Harbor & Seafood Festival, Labor Day Weekend. For more info visit: www.harborfest.net

SEPTEMBER

California Wool & Fiber Festival

Held inside the Mendocino County Fair the 3rd weekend in September. www.fiberfestival.com

Mendocino County Fair and Apple Show

Apple tasting, agricultural show and competitions at the fairgrounds in Boonville the 3rd weekend in September. Deadline for entries is in early August. For more info call 895-3011 or visit: www.mendocountyfair.com

OCTOBER.

Abalone Festival

Caspar Community Center, October. For more info 937-4700.

C'mon Home To Eat

County-wide Eat Local campaign for the month of October. Contact your area's localization group to find out about specific events in your area.

Round Valley Harvest Festival

October, Covelo, Live Power Community Farm. For more info call 983-8196.

Chestnut Gathering

Zeni Ranch on Fishrock Road every last weekend in October or first weekend in November. Sponsored by Mendocino Permaculture. For more info call 895-2309 or 895-3897.

NOVEMBER

Wine & Mushroom Festival

Workshops, dinners, mushroom walks and forays. November-January. For more info call (866)466-3636 or visit www.mendocino.com.

Community Gardens

Community gardens are a vibrant part of a food system, a place where people come together to grow food, share ideas, and strengthen community. Almost every area in the county has at least one. Some support people in need, others are educational. Check them out if you have not already.

BUTLER CHERRY RANCH PROJECT (farm listing on p. 12)

A community orchard project, keeping the ideals of Butler Cherry Ranch alive in the community.

Ph: 463-2736

Wb: www.butlercommunityorchard.org

CASPAR COMMUNITY GARDEN Located at the Caspar Community Center

Contact: Paul Garvin Ph: 964-0769

CLEVELAND LANE COMMUNITY GARDEN

A 20 plot garden in Ukiah that also serves as an educational center.

Contact: Genero Vega

Ph: 467-0383

FORT BRAGG HIGH SCHOOL LEARNING GARDEN Noyo Food Forest (p. 28)

Contact: Susan Lightfoot

Ph: 964-0218

Em: noyofoodforest@riseup.net

THE GARDENS PROJECT OF NORTH COAST OPPORTUNITIES Creating Access to Local, Organic Produce

The Gardens Project of NCO Community
Action is the coordinating agency for The Gardens
Network and facilitates the development

and sustainability of

community-supported gardens throughout Mendocino County. Check out the Green Xchange and our blog on our website.

Contact: Miles Gordon (Project Coordinator)

Ph: 462-2596 x103

Wb: www.gardensproject.org

Mendocino County Jail Horticulture and Permaculture Program

Working with women inmates, the program grows organic vegetables for the jail and offers experience in gardening and permaculture practices.

Contact: Terry McCartney Em: tmc582000@yahoo.com

MENDOCINO COMMUNITY GARDEN

Mendocino Recreational Center

Ph: 937-3037

PLOWSHARES GARDEN PROJECT

This non-profit organization provides approximately 5000 meals per month to the Ukiah Valley community. The Garden Project supplies the kitchen and community dining room with produce.

Contact: Julie Drucker, Garden Coordinator

Ph: 937-3671 or 463-1760

Ukiah Valley

WILLITS COMMUNITY GARDEN

This garden is located at the Willits Integrated Service Center, 221-D Lenore, and run by the Willits Action Group. It is an educational and demonstration garden, a place for community service. Surplus food goes to the needy.

Ph: 459-7054

Em: rsvp@theSighting.com

School Gardens

The following is a list of schools that have gardens. Their role is critical in teaching children about where food comes from, allowing them to connect the farm with their plate. Support them, volunteer in them; encourage all the schools in the county to have a garden.

Anderson Valley: Anderson Valley elementary, middle and high schools

Covelo: Round Valley elementary, middle and high schools

Fort Bragg: Redwood Elementary, Dana Gray Elementary, Fort Bragg High

Laytonville: Laytonville elementary, middle and high schools

Leggett: Leggett elementary, middle and high schools.

Mendocino: Mendocino Middle School, Community School.

Point Arena: Point Arena elementary and high schools

Potter Valley: Potter Valley High

Ukiah: Calpella, Redwood Valley, Frank Zeek, Nokomis, Grace Hudson, Hopland, South Valley, Ukiah High, Pomolita, Eagle Peak, Yokayo.

Willits: Blosser Lane, Brookside, Willits High, San Hedrin High, Sherwood

Seed Saving Guide

				_		
Vegetable *good for beginners	Cycle	Pollination	Pollinator	Isolation Distance	Seed Longevity	Notes
Bean*	A	Self		100'	2-3 yrs	Lose vigor rapidly
Beet/Chard	В	Cross	Wind	1/2 mi	3-5 yrs	Beets X w/ Chards
Broccoli/Kale/ Cauliflower	В	Cross	Insects	1/2 mi	3-5 yrs	X-ing among brassica species is complex, consult a good reference book
Carrot	В	Cross	Insects	1500'	2-3 yrs	X's w/ wild species
Corn	A	Cross	Wind	1/2 mi	2-3 yrs	Adequate population essential
Cucumber	A	Cross	Insects	1500'	5-10 yrs	Harvest at yellow blimp stage
Eggplant	A	Self		150'	2-3 yrs	
Leek	В	Cross	Insects	1500'	2 yrs	
Onion	В	Cross	Insects	1500'	1 yr	
Lettuce*	A	Self		50'	2-3 yrs	Need long season for seed
Melon	A	Cross	Insects	1500'	5-10 yrs	Muskmelons will not X with watermelons
Mustard	A	Cross	Insects	1/2 mi	3-5 yrs	X's with wild species
Pea*	A	Self		50'	2-3 yrs	Do not save seed from diseased plants
Pepper	A	both	Insects	500'	2-3 yrs	Some varieties X more readily than others
Radish	A	Cross	Insects	1500'	3-5 yrs	
Spinach	A	Cross	Wind	1/2 mile	2-3 yrs	
Squash/Pumpkin	A	Cross	Insects	1500'	2-5 yrs	C. moschata 2-3 yrs, C. pepo & C. maxima 3-5 yrs. These 3 species generally do not cross.
Tomato*	A	Self		25'-100'	5-10 yrs	Potato-leaf types generally need the greater isolation distance.

Cycle: A=annual, B=biennial Pollination: Self=self-pollinated, Cross=outcrossed, pollinated by another plant Isolation Distance: recommended distance by which different varieties must be separated to prevent unwanted cross-pollination

Seed Longevity: Averages, not guarantees. Seed longevity depends on the conditions under which the crop was grown and how the seeds have been stored.

Minimum Populations: Crossers require minimum populations to maintain vigor and avoid inbreeding depression. Some recommended minimums: cucumbers, squash, melons- 25 plants; radish, brassicas, mustards- 50-100; sweet corn- 200.

Adapted from Fedco Seeds' Seedsaving Chart—www.fedcoseeds.com

Food Security

The following list of food banks, soup kitchens and meal programs around the county provide an essential part of the food security of the county. Many welcome donations of excess produce from farms and gardens, including yours.

FOOD BANKS & FOOD DISTRIBUTION Anderson Valley Food Bank

Food distribution: 3rd Tuesday of the month United Methodist Church, Boonville 895-3887

Fort Bragg Food Bank

Food distribution: Mon & Fri 12-3 Wed 12-4, Thurs 4-6 910 N. Franklin, Fort Bragg, 964-9404

Plowshares

Garden Project 1346 State St Ukiah, 462-8582 www.plowsharesfeeds.org

Ukiah 1st Presbyterian Church Food Closet

Food distribution: Tue-Fri, 9-12 514 W. Church St Ukiah, 468-9235

Ukiah Food Bank

Food distribution: Mon & Fri, 9-2:30 Wed 1-6:30, Thurs Emergency Food after 4pm Senior CSFP Tues 9-1 888 N. State St Ukiah, 462-8879

Willits Food Bank

Food distribution: Wed & Fri, 1-3,

Wed 4-5:30

229 E. San Francisco St. Willits, 459-3333

HOT MEALS

Anderson Valley Senior Center

Tuesday and Thursday lunch, Last Tuesday dinner Veterans Hall, Boonville, 895-3609

Many of these foods can be canned, dried, or stored to last longer and provide a year-round supply of local food.

What Would a Local Food Economy Look Like?

Locally grown and harvested food. Year-round. Available. Affordable. Farmers making a living income. Farm workers eating well and living in decent housing. County policies supporting local food production All within the next 10 years.

Is this a desirable and realistic vision for Mendocino County? In 2006 and 2007 farmers, gardeners, and their allies got together to ask this question. The response was a resounding YES! The working groups concluded that recreating a viable local food economy will require goals and steps like these:

Infrastructure for Growing, Processing, Storing & Distributing Local Food

Short-term Goals:

- One fuel-efficient delivery vehicle
- Plan for delivery fleet
- Utilize farmers markets
- Website
- · Information bank
- Tool bank & lending library
- Community gardens
- Gleaners network
- Food producer network
- Community harvest juice
- County-wide food directory
- · Local food website
- Commercial kitchens
- Apple & grape presses
- Inventory of existing resources

Medium-term Goals

- CSA centers
- Food distribution centers
- Seed bank
- Grain Storage
- Mobile slaughter facility
- Olive press
- Grain processing/flour mill

Long-term Goals

- Fuel-efficient delivery fleet
- Food distribution centers/network

County Policy to Support Local Farmers & Local Food

Medium-term Goal

 Policies to support small-scale farming to produce food for local use

Long-term Goals

- Living within our capacity to support ourselves
- Replace food imports
- Preserve farmland, wildland, and water

Guiding Questions

- 1. What is our County's carrying capacity?
- 2. What is our current "footprint" re: food, land, water, energy?
- 3. What guidelines and practices will insure ecological and economic sustainability?

Steps Toward a Local Food Economy

A Year-round Supply of Local Food, Fiber & Medicine

Short-term Goals:

- Seed swap, seed-savers directory
- Grain CSA and test plots
- Composting, cover cropping, local soil amendments
- Research and development on native foods and medicine

Medium-term Goals

- County-wide website and database of plants, seeds, and animals
- Equipment coop
- Nut tree orchards
- Local soil testing facility
- Test plots for biodynamic, permaculture, biointensive farming

Long-term Goals

- Local poultry and livestock breeding
- Beans and grains grown here
- Community-level permaculture design

Livable Income for Farmers & Farm Workers, & Affordable Local Food

Short-term Goals:

- Awareness of difference between market-based economy and community-based economy
- Awareness of real cost of food
- Establish dialogue between farmers & community
- Local stores buy from local farmers
- Ag investment corporation
- Housing for farm workers

Medium-term Goal

 A networking clearinghouse for community-based agriculture: farms, labor, land, consumers, investment

Long-term Goals

- Local farms and farmers meet food needs of County
- Farmers earn viable income
- Local food is affordable to those who live here

The Real Value & Genuine Pleasure of Local Food are Appreciated

Short-term Goals:

- Guide to local food
- County-wide Eat Local Month (October of each year)
- · Local markets feature local foods
- Food columns in newspapers
- Local food curriculum in schools networked with health curriculum
- Oral histories
- Farm internships for recent grads
- Educate through farmers markets

Medium-term Goal

 School gardens county-wide integrated with food-related curriculum

Long-term Goals

- Farming is an accepted and respected vocation
- Ag and vocational programs in county schools
- Awareness and celebration of local, in-season food
- Local food at local institutions

Why grow your own food?

Build soil, increase biodiversity and sequester carbon, amazing flavor and tastes, birds, bees, flowers, fruits, vegetables, fungi, bacteria, humus, compost, worms, butterflies, sunflowers, homegrown tomatoes, birth, death, seasons,

cles, seeds, beans pushing up out of the ground, corn

towering over head, spiders, lizards, frogs, tools, sun, water, air, earth, sky, faith, trust, exercise, miracle, activity, quiet meditation, contemplation, friends, laughter, healing, trees for shade, beneficial insects, watermelons, squash, medicine, herbs, fiber, health, nutrition, joy, children, dance, share, participate, play, touch the earth, witness, observe, creation, destruction, learn, germinate, harvest, rest, dig, community, cul-

ture, stories, cooking, eating, celebrate, abundance!

by Linda MacElwee

You Can Create A Sustainable Local Food System

- Buy directly from local farmers, fishers and foragers.
- Find your local farmers market.
- Eat what is in season (see the Harvesting Guide, p45).
- Eat at local restaurants that use local foods, ask them what is local on the menu.
- Shop at locally-owned markets. Request that they buy and highlight local products.
- If you shop at a supermarket, ask where their produce, meat and dairy products come from. Request that they buy and highlight local products.
- Buy wild-harvested seafood caught by local fishers.
- Throw a dinner party or potluck using foods grown in Mendocino County.
- Grow your own food, grow year-round, eat what is in your garden.
- Get involved in a localization group, the Grange or another organization that is working towards a stronger local food system.
- Encourage legislators at all levels to take leadership in developing policies that support small farmers and local food production.
- Teach children to care about where their food comes from. Talk with them about what is on the dinner table and where it has come from.

Most of all ... Meet your local farmers, ask to visit their farms, let them know you appreciate that they are farming.
